

Testing with POSTman

NEXT: THE CURRENT PROBLEM ➔

#Testing with Postman

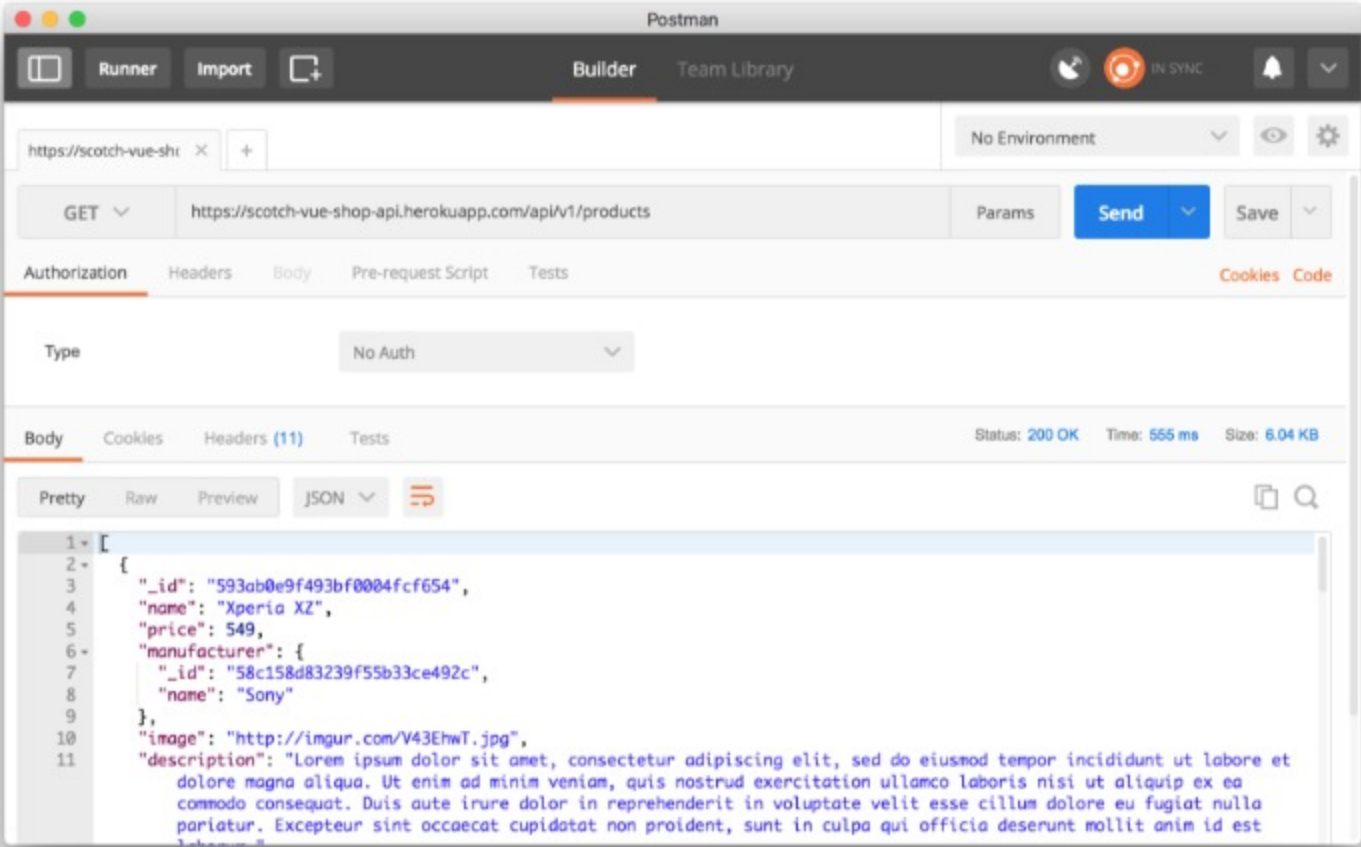

POSTman is a utility tool for testing APIs. You might not have a form and a UI on the browser to start submitting values to your API, therefore, you will need a tool to see if the API is set before moving on. POSTman has your back.

First, you need to install POSTman from [the website](#).

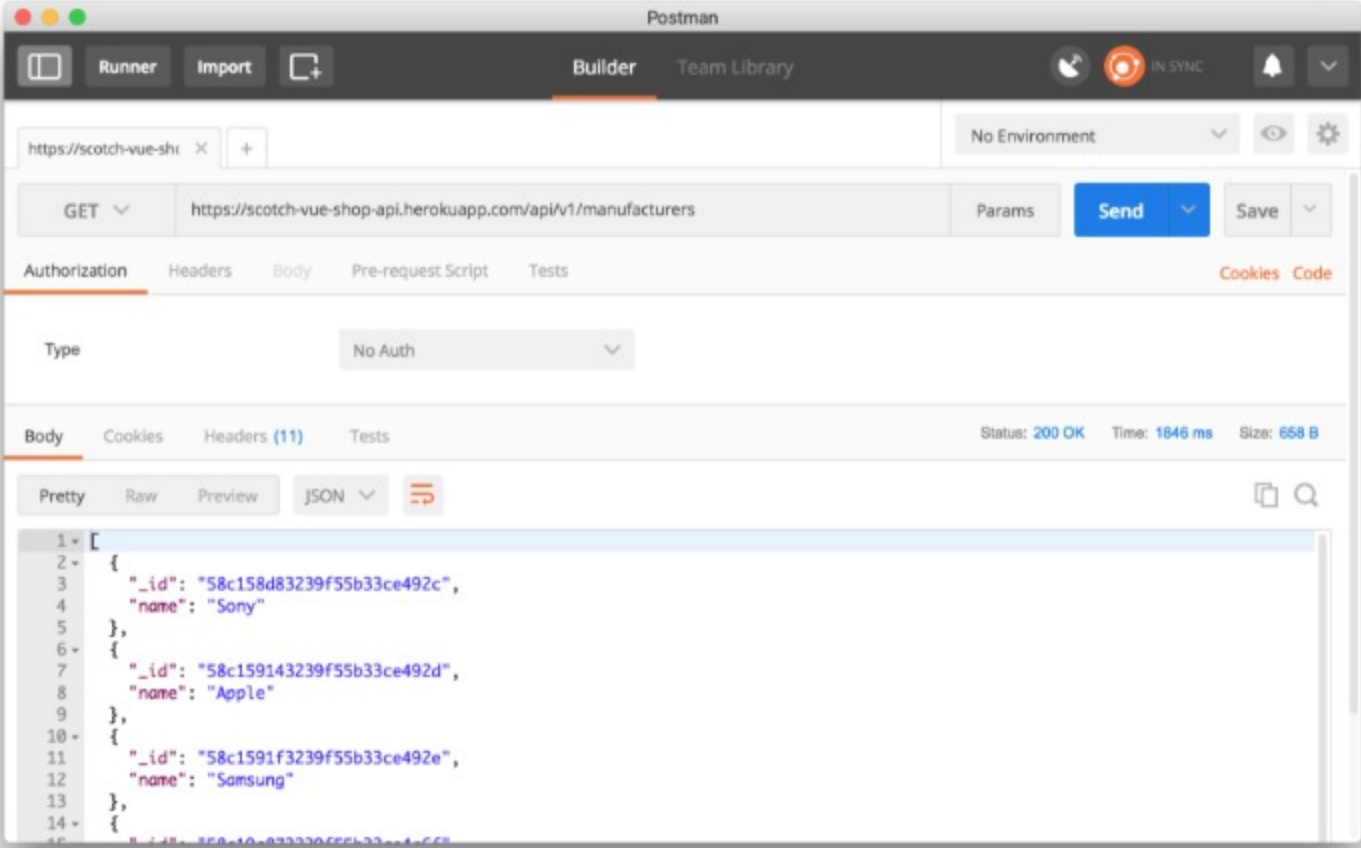

Download and install and you can start testing APIs. Let's begin with our list of products endpoint:

Table of Contents

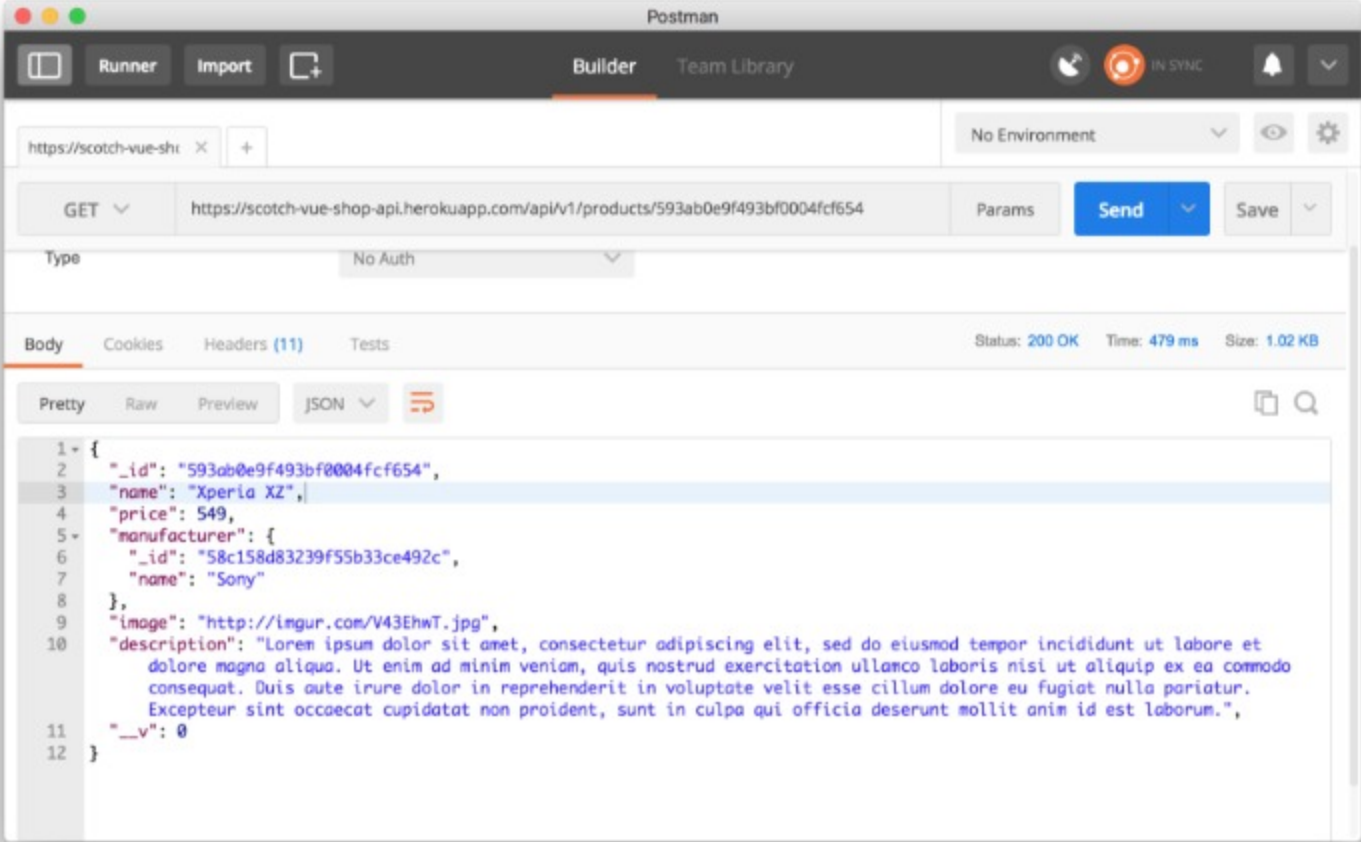

1 Testing with Postman

and list of manufacturers:

You can also test a single product:

And so on...
