

# Single Page Apps

NEXT: CREATING ROUTES →

Single page apps are different from what you must have been used to while building a canonical web app. SPAs for short, are, unlike normal web pages, loaded in on a single URL endpoint. The endpoint is usually the root `/`.

Single page does not mean they have only one view for the user to interact with. It just means that the server only sends a single *real* route/page and the client takes the routing onwards.

This section will guide you through setting up and building Vue apps with client routes.

Getting Started		
1	Introduction	Free
2	Tools	Free
3	Our Task	Free
4	Hello World	Free
Vue Basics		
5	Vue CLI	Free
6	Components and the Vue Instance	Free
